Profile

During my final year of studies, I have emphasized on competitive programming, data structures & algorithms, and front-end development. Over the past four years, my dedication to these areas has led to enhanced rankings in coding competitions. I possess a strong command of data structures and algorithms and have gained practical proficiency in HTML, CSS, JavaScript, and frameworks such as React Js. I am motivated to participate in meaningful projects and actively seek chances to apply my skills, fostering innovation.
